RESEARCH

Image Understanding Lab, Undergraduate Research Assistant
PI: Dr. Irving Biederman | Fall 2015 – Present
I conduct psychophysical testing and neuroimaging research to test theories of human face recognition and evaluate potential causes of developmental prosopagnosia.

Interaction Lab, Undergraduate Researcher
PI: Dr. Maja Matarić **|** Spring 2018 – Present
My research focuses on modeling aspects of human cognition, specifically perception and attention, to facilitate collaboration between humans and robots.
